

Employment Services Reported Outcomes and the Uniform National Threshold Entered Employment Rate for Veterans

Section 4102A(c)(3)(B) of Title 38, United States Code (38 U.S.C. 4102A(c)(3)(B)) requires that the Secretary of Labor establish a uniform national threshold entered employment rate for veterans. The Department promulgated regulations establishing the UNTEER at [20 CFR 1001.160-1001.167](#). The Final Rule took effect on May 10, 2013, and Program Year (PY) 2013 (July 1, 2013 – June 30, 2014) was the first year in which the UNTEER was to be applied. The UNTEER is a national threshold EER for those veterans and eligible persons served in both the Wagner-Peyser funded employment service or JVSG programs in accordance with 20 CFR 1001.160. The UNTEER for each PY is equal to ninety percent (90%) of a PY's national average veterans' entered employment rate (VEER), rounded to the nearest tenth of a percentage point.

The VEER or the entered employment rate reported for veterans and eligible persons for each state may be accessed using the links below. The data available in the State by State tables includes national, regional and state totals on types of jobseekers and the types of services they received. Outcome data are also shown for all jobseekers, eligible Unemployment Insurance claimants, and veterans, including those served by disabled veterans' outreach program (DVOP) specialists or local veterans' employment representative (LVER) staff funded through Jobs for Veterans State Grants or JVSG. Also is a separate table comparing each State's reported VEER to the UNTEER calculated after the end of each PY beginning with PY 2013.

- State by State PY 2013 Performance for Veterans ([Excel Format](#), [PDF Format](#))
 - The PY 2013 National VEER is 52.9% and the UNTEER is 47.6%
